(57) **ABSTRACT**

The invention relates to a cabin (70) for a floating installation, in particular for a ship (60), having a room unit (1) which is bounded at least by a ceiling (10) and walls (20), and lines (30) which supply the room unit (1), in particular with air, water, data, power, illumination, etc. Provision is made according to the invention for the lines (30) to extend in the room unit (1) in such a way that the lines (30) simultaneously act as reinforcing means for the room unit (1).
